

Air-Purifying Respirators (APR)

A wide range of full face masks, half masks, filtering facepieces, hoods and visors, in combination with filters and turbo devices giving the user the best choice in selecting the best protection according to the relevant European Norm.

Eye Protection

For many workplaces and work activities, eye protection is mandatory to protect workers from hazards such as dusts and flying particles or liquid splashes. For this reason comfort and styling of safety spectacles are very important to the many people who have to wear eye protection at all times, whilst at work.

Supplied Air Respirators

Breathing Protection independent of the ambient air. MSA offers various chemical oxygen devices, airline breathing apparatus for long duration applications in e.g. confined spaces and a modular self-contained compressed air breathing apparatus system.

Hearing Protection

In a world of noise, MSA SORDIN products whisper safety. Guarding workers against the daily hazards of noise is of paramount concern in countless industries. The challenge is to balance personal attenuation devices with comfort.

Head Protection

Head protection is required, in almost every industry, where there is a risk of being injured by falling objects, restricted headroom, or indeed there is a risk of falling when working at height. In many workplaces head protection is mandatory and is the main piece of personal protective equipment worn by millions of people every day.

Protective Clothing

Protective Clothing protects the body or parts of the body against different types of hazards.

Portable Instruments

In order to evaluate how much the human being is endangered by hazardous substances in the ambient air or explosive mixtures of gases and vapours in the air, appropriate measuring instruments can be used to recognize, measure and monitor dangerous concentrations.

Permanent Instruments

MSA offers safety solutions with a sophisticated range of stationary gas detectors and controllers. These instruments are permanently installed to determine hazardous locations and to trigger safety-related measures automatically in case of alarm: visible and/ or audible alarms, switching off equipment, switching on ventilation, etc.

Escape Devices

MSA offers a full range of equipment for escape purposes. The most economical solution is a filtering device. It is perfect as long as you know about the type, the properties and composition of the hazardous agent in the ambient air.

Service & Workshop Solutions

MSA provides a high level of customised service. MSA's comprehensive and versatile range of services ensures that your equipment and systems will always be reliable, economical and ready for use.

Thermal Imaging Cameras

The technology of thermal imaging uses a different part of the light than the eyes of human beings can see. Because of that the camera can see through complete darkness and even through smoke.

Software TecBOS.solutions

TecBOS.solutions is the modern software system for all public authorities and safety organisations. TecBOS.solutions was developed using MSA's extensive experience in the field to meet high safety standards, deal with new kinds of danger and, at the same time, to help work more efficiently. The performance efficiency of your personnel will be maximised through the automation of routine

processes and the
optimisation of
operational procedures.
Three software modules
are available.
